

VAN RODOLF M. SULIVA

vrm.suliva.online | 09762137709 | vansuliva4@gmail.com

SUMMARY

Software developer and graduating BSIT student specializing in Network and Administration, with hands-on experience developing web, mobile, backend, GIS, AI-assisted, and IoT-based systems. Proficient in React, React Native, Laravel, Flask, Spring Boot, MySQL, PostgreSQL, and cloud deployment. Interested in artificial intelligence and experienced in using AI-assisted development tools to support coding, debugging, documentation, research, and workflow automation. Committed to building practical, maintainable, and user-centered software solutions.

EDUCATION

Bachelor of Science in Information Technology, Specializing in Network and Administration

Tarlac State University | August 2022 - July 2026

- Candidate for Magna Cum Laude, July 31, 2026
- Best Capstone Project, 2026 - PGT Onboard
- 3rd Place, Saliksiklaban University-wide Undergraduate Research Competition, STEM Category, 2026 - Digital Transformation of Public Transport: Vehicle Tracking and Electronic Payment Solutions (PGT Onboard)

Senior High School - STEM Strand

St. Vincent School Foundation, Inc. | 2020 - 2022

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Java, PHP, C++

Backend Development: Laravel, Flask, Django, Node.js, Express.js, Spring Boot, PHP

Databases: MySQL, PostgreSQL

Embedded Systems / IoT: Arduino, Raspberry Pi

Tools: Git, GitHub, Postman, VS Code, Figma, ChatGPT, GitHub Copilot

Frontend Development: HTML, CSS, React

Mobile Development: React Native

Cloud & Deployment: Google Cloud Run, AWS, Docker

Operating Systems & Networking: Linux, Network Administration

APIs & Libraries: Google Maps Platform, Leaflet, MediaPipe, Google Gemini API

EXPERIENCE

Software Developer Intern

Municipal Agriculture Office - Ramos, Tarlac | February 2026 - May 2026

- Developed a custom agriculture management system to centralize farmer profiles, rice seed distribution records, cooperative data, and farm-location information.
- Integrated Google Maps API for land plotting and farm-location visualization, improving record tracking, reporting, and office workflow efficiency.
- Built system features to support data organization, monitoring, and report generation for municipal agriculture operations.

Freelance Software Developer

Self-Employed | 2024 - Present

- Develop web and mobile applications for clients, covering requirements gathering, UI/UX planning, development, testing, deployment, and maintenance.
- Build maintainable software solutions with documentation, bug fixes, and ongoing feature improvements.
- Work with Laravel, React, React Native, Flask, MySQL, PostgreSQL, and cloud-based deployment tools.

PROJECTS

PGT Onboard

Tech Stack: React Native, MySQL, Flask, Python, Google Cloud Run, Arduino

- Developed an award-winning mobile and IoT-based public transport system featuring GPS vehicle tracking, electronic ticketing and payments, and Arduino-powered passenger counting, supported by a Flask and MySQL backend deployed on Google Cloud Run.

PermitNet: Role-Based Network Access and Bandwidth Management System

Tech Stack: Laravel, PHP, Python, SQLite, Linux, Raspberry Pi, nftables, Linux Traffic Control

- Developed a network management system that automatically detects connected devices, manages access requests, monitors network activity, and enforces role-based internet access and bandwidth limits using Linux nftables and Traffic Control.

FebellaCares: Intranet-Based OPD Healthcare Management System with Patient Trend Analysis

Tech Stack: Laravel, Flask, MySQL

- Developed an intranet-based outpatient healthcare management system for securely managing patient records, visits, and staff workflows, with an ensemble-based patient trend analysis module and analytics dashboard integrated through Flask.

PatientCare: Patient-Centric Hospital Billing Management System

Tech Stack: Laravel, MySQL

- Developed a modular hospital billing system with a patient portal for itemized bill tracking, notifications, disputes, and service history, while coordinating medical orders and billing updates across multiple hospital departments.

Garden of Peace: GIS-Based Cemetery Mapping and Tracking System with QR Integration

Tech Stack: React, Node.js, Express.js, PostgreSQL, PostGIS, Leaflet, Google Maps Platform, QR Code Library

- Developed a GIS-based cemetery management system featuring digital grave mapping, plot and request management, QR-enabled record access, and shortest-path navigation using Dijkstra's Algorithm and PostGIS geospatial data.

AmoraCare: AI-Assisted Adoption Management Platform

Tech Stack: *Laravel, Django REST Framework, Python, MySQL, OpenAI API, Tavily API*

- Built a role-based adoption platform for case tracking, document verification, reporting, reviewer workflows, AI legal guidance, and Gale–Shapley matching recommendations with privacy controls and human review.

Disciple: Mobile Discipleship and Bible Study Management System

Tech Stack: *React Native, Java, Spring Boot, Spring Security, JWT, Spring Data JPA, REST APIs, Heroku*

- Developed a full-stack mobile discipleship platform featuring secure role-based authentication, bilingual Bible reading and quizzes, reading plans, verse and commentary caching, lesson progress tracking, leader assignment, multimedia sermons, and administrative dashboards for managing users, content, and quiz performance.

FitQuest: Gamified Mobile Fitness Application Integrated with Motion Tracking

Tech Stack: *React Native, Flask, MySQL, MediaPipe, Google Gemini 2.5 Flash*

- Developed a gamified mobile fitness application with MediaPipe-powered pose estimation, exercise and progress tracking, adaptive rewards, social leaderboards, and AI-generated coaching feedback using Google Gemini.

CERTIFICATIONS & MICRO-CREDENTIALS

Cisco Networking Academy: Junior Cybersecurity Analyst Career Path, Cyber Threat Management, CCNA: Enterprise Networking, Security, and Automation, CCNA: Switching, Routing, and Wireless Essentials, and CCNA: Introduction to Networks | 2024–2025

LEADERSHIP & COMMUNITY INVOLVEMENT

Youth Leader

Deep & Wide PH - Church Youth Ministry - Paniqui, Tarlac | 2024 - Present

- Mentor and guide youth members through faith-based activities, group discussions, and community-building programs.
- Develop communication, leadership, mentoring, and teaching skills through regular youth engagement and ministry activities.
